

NHS MEDICAL POLICY

Laser removal of vascular hamartomas (port wine stain birthmarks) Procedure 2015-007

Laser removal of vascular hamartomas (port wine stain birthmarks) may be indicated when **ONE** of the following is present:

1	The provider documented that the vascular hamartoma (port wine stain birthmark) is causing functional impairment due to potential or actual compromise of vital structures (e.g., nose, eyes, ears, lips, tongue or larynx).
2	The provider documented that the vascular hamartoma (port wine stain birthmark) involves the eyelids or periorbital tissue and results in impaired vision or strabismus.
3	The provider documented that the vascular hamartoma (port wine stain birthmark) results in auditory impairment or secondary speech delay (lesions located on or around the ear).
4	The provider documented that the vascular hamartoma (port wine stain birthmark) is symptomatic (e.g., bleeding, painful, ulcerated, prior infection). <i>Note: The natural history of port wine stains is to become darker and thicker over a person's lifetime. Darkening and thickening are not symptoms requiring removal.</i>
